Art Unit: 1781

Claims 28-34 are allowed.

Claims 37 and 45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13-19, 35, 36, 38-44, and 46-53 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for oxidoreductase in an amount which results in the presence in a finished dough of 1 to 10,000 units per kg of flour, does not reasonably provide enablement for any amount of oxidoreductase. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. On page 12, lines 1-13, Applicant considers the amount of the enzyme component added which results in the presence in the finished dough of 1 to 10,000 units per kg of flour. Applicant does not teach amounts outside of this range.

Claims 37 and 45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
